Riverbed® Network Assessment Service

Get the Most from Your Network!

The Riverbed Network Assessment Service is a Riverbed Professional Services offering which provides a proactive review of the performance of your network infrastructure. The Network Assessment Service leverages Riverbed Best Practices and the vast experience of our Senior Consultants to diagnose the health of your network and make recommendations aligned with your application delivery and performance requirements.

This service can be executed one-time or periodically as a part of a holistic network analysis program allowing for performance trending, predictive analysis and relevant reporting.

Benefits

- Understand the usage and health of your current network infrastructure.
- Identify potential issues and capitalize by resolving them proactively.
- Determine the most appropriate method to add new projects, applications or traffic to your existing network infrastructure.

Deliverables

- Onsite Riverbed Senior Consultant to perform an analysis of your network infrastructure. This can be a one-time visit or serve as a baseline for measuring results during subsequent visits.
- A customized operational knowledge transfer session for designated customer personnel managing the Riverbed data collection solution.¹
- Add-on service options to the Network Assessment Service (for an additional fee) include:
 - Consolidation Analysis Assessment
 - WAN Optimization Assessment

Scope

- The basic Network Assessment Service package provides for onsite network analysis, diagnostic review and Network Assessment report development for up to five (5) applications.
- Network Assessment Service can be delivered for additional applications for an additional fee per application added to initial assessment.
- The Network Assessment service does not replace Riverbed Training services or other Riverbed Professional Services programs. Riverbed training classes have pre-defined, broadly-scoped agendas.
- The Network Assessment Service does not include the remediation of issues, or potential issues, discovered during the analysis.

¹ Designated customer personnel must be available during the onsite visit and customer.

About Riverbed

Riverbed Technology is the IT infrastructure performance company. The Riverbed family of wide area network (WAN) optimization solutions liberates businesses from common IT constraints by increasing application performance, enabling consolidation, and providing enterprise-wide network and application visibility – all while eliminating the need to increase bandwidth, storage or servers. Thousands of companies with distributed operations use Riverbed to make their IT infrastructure faster, less expensive and more responsive.
