

SD-WAN Observability

Riverbed NPM now includes rich observability for next generation SD-WAN. Get the full picture; including infrastructure health, overlay and underlay metrics with full-fidelity data.

The Business Challenge

Automatic and smart routing decisions between high-cost, SLA-guaranteed MPLS and lower-cost, broadband internet is the hallmark of SD-WAN. With such sophistication, it is indispensable to have full-fidelity observability into the health of your SD-WAN tunnels and underlay to ensure your end-users get the best digital experience.

Riverbed NPM SD-WAN Observability Highlights

- **Ubiquitous Visibility:** Unify flows from across your hybrid infrastructure (Cisco Viptela, switches, routers, firewalls, load balancers etc. and public cloud) using highly scalable, distributed flow collectors.
- **Proactive Monitoring:** Get adaptive alerting, detect anomalies, and catch problems before they impact your business, without any manual intervention.
- **Mitigate Risk:** Get comprehensive observability for your network traffic and infrastructure health in one place with a strong focus on application performance in a vendor-agnostic solution.
- **Full Fidelity NPM:** Leave no blind spots in your NPM observability with full fidelity coverage.

“We were flying blind in terms of network visibility. We had no idea which hosts were traversing particular links. Your tools hold the trading app vendors accountable when we have issues. We’re able to pull packets & show that their servers took too long to respond..”

Senior Engineer,
Securities Trading Company

Riverbed – Empower the Experience

Riverbed is the only company with the collective richness of telemetry from network to app to end user that illuminates and then accelerates every interaction so that users get the flawless digital experience they expect across the entire digital ecosystem. Riverbed offers two industry-leading solution areas – Riverbed, an innovative and differentiated Unified Observability portfolio that unifies data, insights, and actions across IT, so customers can deliver seamless digital experiences; and Riverbed Acceleration, providing fast, agile, secure acceleration of any app over any network to users, whether mobile, remote, or on-prem. Together with our thousands of partners, and market-leading customers across the world, we empower every click, every digital experience. Learn more at riverbed.com.
